

Chinese Dragon

'In this series of lessons I will learn to construct a 3D (dimensional) Chinese dragon's head using recycled materials and learn how manipulate paper using paper quilling techniques'

Lesson 1- Research & Investigation

- *'Taking inspiration from personal research, I know how to produce my own unique, creative and imaginary 2D Chinese dragon head design' .*
- *I can use **LINE, SHAPE, PATTERN** and **COLOUR** precisely.*

Learning Intention 2

- *'I will learn the new art technique of paper quilling (coiling) and experiment with this paper manipulation technique'.*
- *'I can experiment with different styles of quilling and will choose a facial feature in order to produce a quilled section to attach to our final outcome Chinese dragon piece'.*

Lesson 3- Learning Intention

www.shutterstock.com · 88945027

- *'I can draw out correctly proportioned symmetrical template pieces, which will later be assembled and constructed into a 3D form'.*

Lesson 4- Learning Intention

- *'We can, as a group, find creative solutions and use problem solving to assemble our Chinese dragon head onto a box (or constructed form) made from recycled materials'.*

Lesson 5 - Learning Intention

- *'I will take time to complete my **'Passport for Learning'** evaluation for this unit of work'.*
- *'I can assess my own work and give constructive criticism about the work of others in my class'.*
